General Experiences

Andi started his professional employment soon after he graduated from the academic institution in 1993. He joined PT Tripatra Engineers and Constructors where he gained his first experience in engineering and field constructors, being involved in erection and construction of a large-scale Mobil Oil Indonesia, the oil and gas turn-key project. He mainly dealt with static and rotating mechanical equipment including large pressure vessels, heat exchangers, pumps, and gas turbines. He gained extensively hands-on experience in engineering equipment installation up to testing-commissioning stages.

He later switched to his loss adjusting experience when he joined one the international loss adjusting company in 1997, and leave this company in 2012 having reached management level being the Operations Manager. He then joined other international loss adjusting company, positioned again at Operations Manager until this May 2012.

From year 2012 to 2016, he joined PT Radita Hutama Internusa, a Charles Taylor company - being an Assistant Director, in assisting the Board of Directors of the company to develop a newly established Property, Casualty and Special Risk division, in addition to the previously well-known Marine Hull and Cargo Division.

Andi continued his operation and gaining more widened market experience with joining PT Kuadra Inti Adjuster, and then PT Prima Adjusterindo Mandiri, prior joining PT Axis International Indonesia.

During his service in loss adjusting profession, he had broadened his experience in handling many industrial mechanical breakdown losses, power plants breakdown, catastrophe losses, as well as other fire and perils claims, all risks claims, fidelity, liability, theft and couple of marine losses.

Up to present, he is continuing developing his loss adjusting skills and operations management.
