Experience in investigating damage to construction structure and utility.

## **General Experiences**

During studies at the University of Indonesia, Gunawan gained experience in construction by working as a freelance estimator, design engineer, site engineer, and project manager.

After graduating from the Engineering Faculty of the University of Indonesia, Gunawan joined PT Winatek Widita, a piping contractor, as a foreman for trenching.

Gunawan was later recruited by, PT Kemas Indah Maju as a Project/Development Coordinator and as a Marketing Manager Assistant with responsibility in handling international clients and internal management.

In 2008 Gunawan joined the Axis Group as an Adjuster in PT. Axis International Indonesia. In his two years with the company Gunawan has gained significant experience in the handling of a large variety of property losses, with specialisation in all engineering classes of insurance.

Gunawan is a young and energetic adjuster, and his skills and experiences are being utilised for the development and growth of the Axis portfolio in Indonesia.
