General Experiences

Ignatius Wahyu Haryawan graduated from University of Udayana. During that time, he gained experience at PT PLN, a state-owned power supply company, working on transmission and distribution control systems using SCADA.

After graduating from the Engineering Faculty of the University of Udayana, Wahyu joined PT Asuransi Central Asia (PT ACA) as a Management Trainee. In PT ACA, he gained experience within general insurance knowledge and practices. He was positioned as a Risk Engineer in the Risk Management Department from March 2005 to July 2008, with specific job descriptions to undertake physical/condition assessments, review safety practices and procedures and making survey reports for underwriting purposes.

Properties surveyed include manufacturing industries, high rise buildings, heavy machinery and equipment.

Wahyu was later recruited by PT Asuransi Tokio Marine Indonesia, a joint-venture general insurance company from the period August 2008 to August 2010. Whilst with TMI he gained further experience as a risk engineer. Besides undertaking risk surveys he also conducted infrared thermography inspection of electrical installations and equipment.

Wahyu has now joined the Axis Group as an Engineering Adjuster and is further developing his skills and applying his engineering knowledge to the adjustment of claims. He handles various property, cargo and machinery breakdown claims.
