

## **RIO ADRIANSYAH**

Senior Adjuster - Engineer  
Indonesia

### **Qualifications**

Bachelor of Engineering in Mechanical (ST)

### **Work Experiences**

2010 – Present	PT Axis International Loss Adjusters & Surveyors, Indonesia General Adjuster
2006 to 2010	Bachelor Degree in Mechanical Engineering, University of Indonesia

### **Areas of Expertise**

Familiar with engineering in energy conversion and automotives, including mechanical equipment (rotary equipment, combustion engines, construction, cooling systems, machining, and thermal measurement).

### **General Experiences**

Rio entered the engineering Faculty of the University of Indonesia in 2006 and graduated in 2010 with a degree in mechanical engineering.

During his studies at the University of Indonesia, Rio has enhanced his communication skills and his leadership qualities by joining the Student Executive Board.

Rio gained further experience at PT Krakatau Steel working on their cooling and water treatment systems.

Rio has now joined the Axis Group as an Adjuster Engineer and is developing his skills and also enhancing his engineering knowledge.

He handles various machinery breakdown losses, heavy equipment and property claims.
