## **General Experiences**

Berly started his professional employment soon after he graduated from the academic institution in 2011. He joined PT Radita Hutama Internusa where he gained his first experience in cargo Surveyor and Adjuster. On a daily basis, manage claim processing and administration to ensure that all claims are processed in compliance with established protocols and standards. Collaborate with the Technical Advisor, Technical Director, and Managing Director to discuss and evaluate big and complicated issues in a proactive manner. Proactively gather feedback and contribute to the continuous development of claims management procedures.

He later switched to Insurance company experience when he joined PT Asuransi Wahana Tata in 2012, and leave this company in 2013 having reached management level being Marine Underwriter. Undertakes the risk associated with a venture, an investment, or a loan in lieu of a premium. Underwrite incoming requests for Marine Hull insurance coverage, collaborating with the Head of Underwriters, other divisions, the branch office, and coworkers to ensure that all processes are implemented.

He then joined PT Global Internusa Adjusting, being an Average Adjuster & Marine Surveyor, Manage claim processing and administration on a daily basis to ensure that all claims are processed according to established processes and guidelines. Collaborate with the Technical Advisor, Technical Director, and Managing Director to proactively discuss and assess big and complicated claims with coworkers in order to get input and assist the continual improvement of claims management procedures.

Berly continued his operation and gaining more widened market experience with joining PT Tugu Reasuransi Indonesi, being an Deputy Manager Claim Analyst Marine, Aviation and Offshore prior joining PT Axis International Indonesia.

During his service in loss adjusting profession, he had broadened his experience in handling many industrial Marine Insurance speciality.

Up to present, he is continuing developing his loss adjusting skills and operations management.
